

DEVANG SABALPARA

FLUTTER DEVELOPER

devangsabalpara555@gmail.com | 7777947638 | Surat, Gujarat, India

PROFESSIONAL SUMMARY

Results-driven Flutter Developer with 3+ years of experience building and scaling 6+ production-grade mobile applications across Event Management, Firebase-powered solutions, real-time chat systems using sockets, and crypto domains.

Skilled in Flutter and Dart development, with hands-on expertise in Bloc/Cubit for efficient state management. Proficient in integrating RESTful APIs and Firebase services, with a strong emphasis on building high-performance, scalable applications. Adept at designing user-focused solutions, delivering complete feature lifecycles, enhancing app reliability, and working collaboratively within agile, cross-functional teams.

WORK EXPERIENCE

Software Engineer – Flutter

ELaunch Solutions Pvt. Ltd.

Dec 2023 – May 2026

- Developed and maintained multiple production-grade cross-platform Flutter applications using Bloc/Cubit and Provider architectures, ensuring scalable and maintainable code.
- Integrated RESTful APIs and real-time features using Socket.io, enabling seamless data synchronization and interactive user experiences.
- Implemented Firebase services including Authentication, Firestore, FCM, and Crashlytics to enhance security, enable real-time communication.
- Optimized application performance by debugging critical issues, reducing UI lag, and improving responsiveness, contributing to a smoother user experience.
- Engineered efficient API integrations that improved application performance and streamlined complex workflows such as booking systems and dynamic data handling.
- Engineered efficient API integrations that improved application performance and streamlined complex workflows such as booking systems and dynamic data handling.

Flutter Intern

ELaunch Solutions Pvt. Ltd.

June 2023 – Dec 2023

- Flutter Developer Intern with 6 months of hands-on experience in building cross-platform mobile applications using Flutter and Dart.
- Skilled in UI/UX implementation, API integration, and state management with a focus on performance and clean code practices.

TECHNICAL SKILLS

- Languages & Frameworks: Flutter and Dart
- Mobile Development: Flutter (Cross-Platform), Android & iOS (Platform-Level Understanding)
- Architecture & State Management: Provider, Bloc/Cubit
- Backend & APIs: RESTful APIs and Socket.io
- Local Database: SQLite, Drift
- Firebase Services: Authentication, Firestore, Cloud Messaging, Crashlytics
- Google Services: Google Maps APIs

PROJECTS

Oppi Wallet

- Engineered and integrated interactive Home Widgets and App Shortcuts using Flutter with native Android and iOS implementations.
- Designed and developed wallet modules covering transaction flows, balance interfaces, support ticket functionality, and REST API-driven features.
- Architected reusable UI components and modular code structures to enhance scalability, maintainability, and development efficiency.
- Delivered cross-platform Home Screen Widgets enabling quick wallet access, real-time balance visibility, and interactive refresh actions.
- Implemented platform-level integrations using native communication channels to support widgets, shortcuts, and Flutter-native interoperability.
- Play Store: [Play Store Link](#)
- App Store: [App Store Link](#)

Leylix

- Delivered cross-platform solutions for mobile and web using Flutter, ensuring scalable architecture, responsive interfaces, and consistent user experiences.
- Designed and implemented reusable UI architectures for Event Card and Sponsor World modules, improving component reusability and long-term maintainability.
- Developed and Optimized Support and Chat systems, integrating backend communication workflows and interactive engagement features.
- Integrated RESTful services to support core application functionality, including chat, profile management, settings, and support workflows.
- Play Store: [Play Store Link](#)
- App Store: [App Store Link](#)

IMedica

- Designed and implemented doctor search functionality, improving discoverability and optimizing search-driven user workflows.
- Developed Devices UI using reusable Flutter components to support scalable and maintainable device-related features.
- Built and enhanced Doctor-Patient Chat functionality, enabling seamless communication workflows and interactive user engagement.
- Play Store: [Play Store Link](#)
- App Store: [App Store Link](#)

Security-saas

- Developed and maintained core features for a Security SaaS platform, supporting workflows between companies and security guards for task assignment and management.
- Implemented guard task assignment modules, enabling companies to assign, manage, and track tasks for security personnel.
- Built SOS emergency functionality, allowing users to trigger alerts that activate emergency sound and send notifications to nearby guards for rapid response.
- Developed real-time workflow features to support guard coordination, alert distribution, and emergency response communication.

EDUCATION

Vivekanand College 2020 – 2023

Bachelors's in Computer Application (BCA)

K&MP High School 2020

Higher Secondary School Certificate (HSC)
